OVERVIEW

OBJECTIVE

- This document provides business and technical requirements for ImageTrend to create an automated process that pushes defined data elements from ImageTrend to Virginia DMV (TREDS).

REQUIREMENTS/SPECIFICATIONS

- ImageTrend will add a unique identifier to ImageTrend incident records.
- ImageTrend will update the Service Bridge run form to send data to the TREDS web service.
 - Data will be sent to the TREDS web service when incident run is marked as complete.
 - Service Bridge will only send incidents that meet the following criteria:
 - Cause of Injury is equal to one of the following values "Bicycle Accident", or "Motor Vehicle traffic accident", or "Motor Vehicle non-traffic accident", or "Non-Motorized Vehicle Accident", or "Motorcycle Accident" or "Pedestrian traffic accident".
 - Incident has not been "processed" (export flag has not been set).
- ImageTrend will create a process to scan for updated incident records that have previously been sent to the TREDS web service.
 - If an incident has already been exported but one of the defined elements (see below) has been updated after the original export, the incident will be re-exported.

ASSUMPTIONS

- This process will look at all incidents that with the Virginia State Bridge flag.
- The process to scan for updated incident records will run on a scheduled basis.
- The process will only export data elements as defined below.
- ImageTrend will not receive data back from TREDS.

STATEMENT OF WORK

STATEMENT OF WORK

Development

- Update the Service/State Bridge to send data to TREDS when "Mark Run as Completed" is selected.

20855 Kensington Blvd
Lakeville, MN 55044

www.imagetrend.com

Telephone – 1.952.469.1589
Fax – 1.952.469.5671

- Create a process to convert data into NEMSIS XML format (remove all nodes not part of the defined data elements below).
- Create error handling and history/audit tracking that will store information on data that has been sent to TREDs.

Database development

- Add a unique identifier to incident table
- Update the Service Bridge to send data to TREDs when "Mark Run as Completed" is selected.
- Create a process to check if an updated incident (that has been previously sent to TREDs) had any of the defined fields updated; if so send the incident record to TREDs.

Total Development and Database Hours: 60**Project Management**

- Planning, meetings, documentation, webinars

Project Management Hours: 6**Testing**

- Testing within applicable environments (development, beta, alpha and live sites)

Testing Hours: 15**Implementation/Integration**

- Web service setup
- Deployment

Implementation/Integration Hours: 20**Total Project Hours: 101****DATA ELEMENTS**
